
●: best cut-off chosen on held-out half of pairs. ● at the grey tick = rule removed; ● near 100% = rule still present.
Bars: 95% bootstrap intervals (resampling seeds, then test pairs).

○ Before removal
× After removal: the model's actual answers
◎ After removal: does the cue still change the score? (best cut-off)
▬ Base model, no hidden rule (best cut-off)
